Title: Lead Web Developer/Full Stack Developer	Location: Jackson, MS
Type: Direct hire – full time	Industry: Manufacturing

Overview

The primary function of this role is to ensure effective development and deployment of all web-based initiatives within the company's Communications Department for its partners and subsidiaries. The selected candidate will also have several other responsibilities.

This position will develop strategies and implementation goals for web sites and web-based solutions based on brand audience and work with internal and external vendors. He or she works with the Communications Manager and other team members on these tasks and other responsibilities as described below.

*Job Title: Lead Web Developer
Department: Communications
Reports To: Corporate Communications Manager*

Responsibilities

- Server setup, relational database architecture, front-end & back-end development
- Write well designed, testable, efficient code using best software development practices
- Create site layout/user interface by using standard HTML/CSS practices
- Integrate data from various back-end services and databases
- Set up and maintain virtual and installed Linux servers
- Gather and refine specifications and requirements based on technical needs
- Create and maintain software documentation
- Be responsible for maintaining, expanding, and scaling sites
- Stay plugged into emerging technologies/industry trends and apply them into operations and activities
- Team with web designers to match visual design intent

Qualifications

- Proven working experience in web programming
- Top-notch programming skills and in-depth knowledge of modern HTML/CSS
- Proficiency with the following: PHP/MySQL, Laravel, Javascript, JQuery, WordPress, Git Version Control
- A solid understanding of web design and how web applications work including security, session management, and best development practices

- BS in computer science or a related field
- **Excellent communication skills, both written and oral**
- Team player
- Strong problem solving skills and detail oriented
- Macintosh experience
- Able to travel

- **Additional info:**
- The intranet is built on PHP, HTML, CSS, SQL and it uses the Laravel PHP framework. Git is used for version control. I would put high emphasize on finding a Laravel developer. In addition to the Laravel PHP framework, existing sites are built using WordPress.
